PROFILE

Second-year BScIT student focusing on red teaming. Skilled in MERN stack development, including building REST APIs, MongoDB schema design, and implementing authentication and backend logic using Node.js and Express.

WORK EXPERIENCE

INSTRUCTOR - GURU INSTITUTE OF ENGINEERING AND TECH.

Jan 2026 - Present

- Mentored students in HTML, CSS, and Python with hands-on projects, and problem-solving approaches, while also introducing cybersecurity awareness such as common attack workflows.

BACKEND DEVELOPMENT INTERNSHIP - FLAGFORCE

June 2025 - Sep 2025

- Built and maintained backend APIs using Node.js and MongoDB, implementing CRUD operations, validation, and authentication to support scalable application workflows

EXECUTIVE - PRESIDENTIAL SOFTWARE CLUB (PGS).

Oct 2025 - Feb 2026

- Mentored club members to build React and Next.js applications and, helping them build basic web applications.

CERTIFICATIONS

- Junior Penetration Tester (eJPT)
- Certified Associate Penetration Tester (CAPT).
- APIsec Certified Practitioner
- Fortinet Certified Associate in Cybersecurity

PROJECTS

FlagForge (Collaborative)

- Cybersecurity-focused project work centered on building a usable product surface around security ideas, team execution, and practical delivery.
- Designed and built multiple CTF challenges for Flagforge

SecYourFlow (Collaborative)

- Built SecYourFlow, a cyber risk dashboard that combines threats, vulnerabilities, and compliance data to help teams prioritize and manage security risks efficiently.

Raspberry Pi NIDS with Suricata

- lightweight Network Intrusion Detection System (NIDS) for Raspberry Pi using Suricata with automated GitHub-based alert notifications..

EDUCATION

Bachelor of Science in Information Technology

Presidential Graduate School (2024 - 2028)

Higher Secondary Education (Science)

Trinity International SS & College (2022 - 2024)

SKILLS

- Web Application Security
- Pentesting Fundamentals
- Security Research & Exploit Analysis
- Node.js & Express.js
